**H. Lincoln Foster : Rock Gardening** before purchasing it in order to gage whether or not it would be worth my time, and all praised Rock Gardening:

One of the rock gardening classicsBy CustomerI knew I was on to something when this title kept cropping up in gardening articles and in other gardening books. Author H. Lincoln Foster is a premier authority on how to build a rock garden. He lists plants he has tried with great success and those with which he has experienced failure. Written in a comfortable conversational style and illustrated by his wife, Laura Louise Foster. A quote from the dust jacket: "The heart of the book is an alphabetical descriptive catalogue of more than 400 genera, comprising over 1900 individual plants, with cultural directions for each. The range runs from spring-flowering bulbs to autumn asters, from ground covers to the rarest of alpine treasure, from creeping herbs to broad-leaved evergreens and dwarf trees, from favorite perennial standbys to suitable ferns and the most pleasing of wildflowers."
