Raul Cabra, Cathy Lang Ho : San Francisco Contemporary Furniture before purchasing it in order to gauge whether or not it would be worth my time, and all praised San Francisco Contemporary Furniture:

As much as furniture designs reveal about the individuals who use them, they provide insight into the culture from which they emerged. San Francisco Contemporary Furniture is the first in a series of books examining the work of young furniture designers in different cities and regions across the globe. It showcases a selection of work from a young and emerging generation of Bay Area-based designers of furniture, decorative objects, and utilitarian elements for the home. Commenting both directly and indirectly on how Bay Area designs feed on local environment and culture, the book also aims to reveal how local elements are translated beyond the borders of San Francisco through these designers' work. A thoughtful and unified selection of new design, the book is organized thematically according to the tendencies and values these designers share.
