Maria Finn : Seed Keeper: Organize, Record, and Store before purchasing it in order to gauge whether or not it would be worth my time, and all praised Seed Keeper: Organize, Record, and Store:

29 of 31 people found the following review helpful. Disappointed By DJBI should have read the one review before purchasing this product. I agree with the first review, too many holes to store seeds that are gathered on your own. I already have my seeds in zip lock snack bags and was looking for a better way to organize and store them. I still have to put them in something to insert into the envelopes in this binder, thus making the binder thicker than it should be. In addition, there is not any way to add additional seed envelopes when you fill these up. I will probably return this and purchase something different. I found something called the Master Gardener's Seed Organizer which looks more like what I need. It is more expensive, but I think it will work much better than this little binder. 16 of 17 people found the following review helpful. Not what I expected By Kate L. I love the illustrations in this book and the room for writing down notes, journaling, etc...but when I ordered I thought the seed envelopes would be great for plucking seeds from my garden and storing them. WRONG. The envelopes all have holes, presumably so you can put your store-bought

packets in and see the contents, but there is no way to secure home grown seeds. I've had to resort to getting other envelopes to put inside the journal envelopes, and that's just redundant. Maybe I should have done more research prior to purchase, but I feel like I just wasted a bunch of money on this book. 0 of 0 people found the following review helpful. Very DisappointedBy Melissa GrimesNot a practical product for someone who has more than 10 seed packets to organize. Not what was expected. Definately not worth the money. Binder is about half the size of a 'normal' binder. Ony 10 regular sized sleeves and 10 large sleeves. Sleeves are not transparent, so you still have to pull out the packet to read information on the back of the packet. Sleeve also appear to easily tear. There are places to write harvesting notes, but only for four plantings. I would have been better off buying a regular binder and platic photo sleeves. If you have a very small garden with a few varieties, this may be perfect for you--not for me.

Finally, a smart way for gardeners to store their treasured seed packets. With envelopes for two different sizes of packets, space to record important detailssuch as date purchased, date planted, and yearly weather conditionsand beautiful color illustrations, the Seed Keeper neatly arranges seeds to keep gardeners organized through the seasons.

"Homestead-cute through and through."-HGTV GardensAbout the AuthorMaria Finn is a regular contributor to Sunset Magazine and has written for Saveur, Gastronomica, The New York Times, The Wall Street Journal, and Wine Spectator, among many other publications. She is the author of A Little Piece of Earth: How To Grow Your Own Food in Small Spaces (Rizzoli, 2010). She lives in San Francisco. Masako Kubo is an illustrator living in Japan. Her client list includes Real Simple, Country Living, The Daily Telegraph, Brides magazine, and many other publications. She won the AOI Images Best of British Contemporary Illustration award three years running, and was shortlisted for the Victoria Albert Museum Illustration awards in 2011.
