With the ever increasing rate of crime, security has become an important concern for many people and as such new

and innovative ways are being found to get that sense of peace that so many other individuals desire. *Selecting Video Monitors For The Home* is one of the books that can help the homeowner or small business person learn the best ways that they can monitor what is going on in their premises. Bear in mind that crime is not simply restricted to individuals that steal something but also those individuals who may be carrying out unscrupulous actions in the home. It may be the housekeeper, the nanny or the private tutor, with an effective video monitor, that can all be kept track of. Also bear in mind that the video monitor may not be for security purposes alone as they do serve many other purposes. This book helps the reader to find the best one that will suit their needs.

About the Author Neville Francis grew up in a neighborhood that was relatively crime free and so he was extremely surprised when certain things started to happen. His neighbors complained that they were missing certain items and that they were at their wits end trying to find out how their stuff was disappearing. He noted that they did have security cameras outside but advised them that they should also have some inside as well as clearly it was an individual that was familiar with their residence that was taking their property. With Neville's help they soon found that the housekeeper was the culprit. Encouraged by the fact that this information helped his neighbors, he took this idea a step further and started to put a book together that others can use to figure out effective ways that they can use the video monitors to their benefit. It is one thing to set up a video monitor in the home; it is quite another thing to have one that works effectively.
