offering how-to projects for ultra-efficient storage units that save readers hundreds and even thousands of dollars by showing how to make their own storage pieces. Fully illustrated, with clear step-by-step instructions and a comprehensive techniques section, it covers how to build stand-alone and built-in pieces that maximize space and organization: cupboards, entertainment centers, under-stairway clothing racks, under-bed pull-out drawers, linen closets, toy chests, and bookcases and shelves sized correctly for paperbacks, art books, or collections of any type.
