Violet Purton Biddle : Small Gardens and How to Make the Most of Them before purchasing it in order to gage whether or not it would be worth my time, and all praised Small Gardens and How to Make the Most of Them:

0 of 0 people found the following review helpful. Trip back in time!By LittlmystriII am giving this book a five star review because I love reading old books. This one is so interesting to me. If you are true gardener at heart and love old books you will treasure this. It is written in Old English and covers many garden topics. It is interesting to note that this book was written in the late 1800's but mentions raised garden beds and the 'collecting of rainwater'. Garden

practices have changed over the years but much of what we consider new today are actually garden practices that date decades back. If you need a 'how to' book this won't do. This book describes some very unique flowers in it. It also has a lot of information about roses in it as many of the older books do. There is information on bulbs, trees, shrubs, etc. I especially got a kick out of chapter VIII-Enemies of the Garden. Some of the next chapters describe some interesting garden methods. 1 of 1 people found the following review helpful. Good Historical Insight By Brittnee Laverty It's always funny to me to go through older books and see how they included advertisements for seeds, planters, and more. Boy has our pricing changed in 100 years! This little gem of a book has several chapters of importance. My favorite was the "The General Arrangement of the Garden". It really helped me understand how to pick flowers and plants from my local nursery. The language throughout the book can make you laugh since we no longer use words like "vixen", "delightful" and other quirky words. 1 of 1 people found the following review helpful. Glad it was free By Frank Terrible book. Fox news and the local Sunday paper has less advertising combined compared to this dreadful book which I wouldn't even use to read while on the throne!

Small Gardens and How to Make the Most of Them is a classic home gardening guide by Violet Purton Biddle. It is imperative that a small garden, such as one generally finds attached to suburban or small houses, should be made the very most of. Frequently, however, its owners seem to think that to attempt to grow anything in such a little plot of ground is a veritable waste of time and money, as nothing ever comes of it. The aim of this gardening guide is to show that even the tiniest piece of land can be made pretty and even profitable, if due attention be given it.
