Each converted space demonstrates how creativity and imagination can transform factories, attics, and dance halls into functional and beautiful lofts.The homes in Small Lofts -- all presented in stunning full-color photographs -- cover four continents and are located in both urban and rural areas, showcasing the diversity and style found in loft design across the world today. For the dreamer who loves contemporary design, Small Lofts proves that you can make effective use of space without sacrificing style.

From the Inside FlapThe selection of projects presented in this book includes the most diverse residential solutions.

The spaces all have reduced proportions and conserve the principal design and architectural characteristics of this type of space. In every case, the space had a former use and has been rehabilitated, starting with the renewal of its deteriorated aspects. In general, the former function, as well as the formal existing elements, serve as the project's compositional theme. In most cases, the structural system has been emphasized and incorporated as an important element of the ambience. About the Author Alejandro Bahamn is an architect, writer, and editor.
