Robert Hastings : Solar Air Systems - Built Examples (Solar Air Systems Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Solar Air Systems - Built Examples (Solar Air Systems Series):

Thirty-five different buildings with successfully installed solar air systems are described and documented. The building types cover single family houses, apartment buildings, schools, sports halls, and industrial commercial buildings with six different configurations of solar air systems used. Each example building is described over several pages, with plans, performance details and illustrations provided. This is supplemented by a summary of the types of

system used.

Erich Hoyt has provided the definitive account of the status and protection of Earth's cetaceans; it is a well-written and interesting work on an important subject, accessible to both experts and general readers. Professor Edward O Wilson, Harvard University
About the Author Robert Hastings is an architect and managing director of Architecture, Energy Environment GmbH, Switzerland.
