Marcia Margolius : South African Decor and Design 2008 before purchasing it in order to gage whether or not it would be worth my time, and all praised South African Decor and Design 2008:

The cover this year is similar to last year's mosaic cover only by virtue that it is bright and colourful. We have gone in the totally opposite direction to last editions cover, where with the Mosaic cover we showed no obvious decor elements, this years edition shows elements from every area of the home and will leave the potential purchaser of the guide, in absolutely no doubt as to what the title is about. The brief to our designers was - "Dolls House" and we feel they have created a cover that is powerful and that is really going to stand out on the shelf.
