**William Lanier Hunt : Southern Gardens, Southern Gardening** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Southern Gardens, Southern Gardening:

Originally published in 1982, this bestselling collection of gardening writing by William Lanier Hunt--one of the South's leading gardening writers and horticulturalists--is now available for the first time in paperback. Arranged by months of the year, Southern Gardens, Southern Gardening is filled with useful, commonsense instruction, as well as the wisdom and art of gardening.

""Southern Gardens, Southern Gardening" squeezes the gardening experience into 12 monthly chapters. It's good

information, written at an easy pace, like Southern prose should be." --Southern Living"Every page of "Southern Gardens, Southern Gardening" speaks with a civilized and cosmopolitan accent; it is clearly one of the best books on horticulture published in recent years." --Allen Lacy," Horticulture""William Lanier Hunt's book is the work of a learned and well-traveled garden enthusiast . . . the work of a writer whose gardening horizons are very wide, and whose sense of history and locale is strong." --Harriet H. Jansma," Garden Design""This attractive collection of miniature essays about individual kinds of plants, arranged according to their month of bloom or prominence in the landscape, deserves attention on both sides of the Mason-Dixon line. Although Northern gardeners may envy Mr. Hunt his easy talk of gardenias and jasmines and tender species of camellia, he writes vividly out of a lifetime of experience with plants, many of which are not restricted to the South." --Wall Street Journal

From the Back Cover"A leading authority on Southern gardens, William Lanier Hunt is a consultant to botanical gardens and has been involved in the restoration of historical gardens. This collection is an informative guide to the finer points of gardening."In entries arranged according to months of the year, Hunt discusses such subjects as the finding and growing of native plants, flowers, and trees. His style is informal, light, and instructive. He respects the reader's intelligence and assumes the reader shares his love for green things. He refers to what gardeners of the past have done, and the scope of his interests is wide . . ."

--Savannah "News-Press"About the AuthorAt the time of his death, William Lanier Hunt was a consultant to botanical gardens throughout the South as well as Honorary President of the Southern Garden History Society. He is the donor of the W. L. Hunt Arboretum at the North Carolina Botanical Garden.
