Teiji Itoh : Space and Illusion in the Japanese Garden before purchasing it in order to gage whether or not it would be worth my time, and all praised Space and Illusion in the Japanese Garden:

3 of 3 people found the following review helpful. EnchantingBy Federico J.This book is truly a rare jewel, a delight to read. Not a scholarly text, but a revelation of the most subtle concepts underlying traditional Japanese landscape design. Definetely a collector's item, but most of all, a unique source of inspiration for landscape designers.1 of 1 people found the following review helpful. Good content on a subject with few other books, but poor picturesBy jaymcleodIt's hard to find a good book on this subject, and this one is pretty good. Unfortunately, the pictures are less than spectacular, which is unfortunate for a subject that lends itself to clearly to visual representation. Otherwise, it's a good book, and serves to inform novices and remains a decent reference book.
