An excellent investigation of the factors that contribute to the making ...By threedeahsAn excellent investigation of the factors that contribute to the making of creative space, in particular as it applies to the workplace environment. It takes a generally theoretical and academic approach to the subject, which makes it a nice complement to the nuts-and-bolts approach found in the book Make Space by Doorley et al. I heartily recommend it for anyone interested in the psychology of innovative physical environments.1 of 1

people found the following review helpful. A revealing and highly informative book!By Michael V. JulienExcellent structure, excellent content, and lays out the challenges and methodological approaches in clear and coherent ways.

Investigating the impact of physical surroundings on workplace behavior, this book explains the relationship between the design of working environments and levels of creativity and innovation. Based on the available evidence, *Spaces for Innovation* identifies the physical characteristics of workspaces that are associated with high innovation potential and determine why they have an effect. Providing a basic framework for the design of innovative environments, this research-based book can be used in analyzing ways to enhance physical space in the pursuit of innovation. It is a pattern guide, providing context, examples, inspiration, and direction to help you explore and understand your organizational challenges.

About the AuthorKursty Groves Knight is an author and expert in creativity and space. She is a consultant to industry on innovation, capability and environments to support this and is author of *I Wish I Worked There - A Look Inside the Most Creative Spaces in Business*. She is an adjunct professor at IE University in Madrid, Spain where she teaches on the international graduate program Master in Work Space Design. Oliver Marlow is an author and designer with expertise in space, cowork and collaboration. He is a pioneer of the coworking movement and an expert on the relationship between space, collaboration and creativity. In 2013, he co-authored *Codesigning Space*.
