Ross Bolton : Stanley Tools 1929 Catalog Reprint before purchasing it in order to gage whether or not it would be worth my time, and all praised Stanley Tools 1929 Catalog Reprint:

This small book gives you a view into a pre-globalization American company, where quality tools were designed and manufactured here rather than Mexico and China. That is a lost world that despite what our aspiring politicians may claim, will not be coming back anytime soon. There are still great small companies making

hand tools like Lie-Nielsen and Starrett. Sadly Stanley is no longer the place where craftsmen and women go to buy quality tools. 0 of 0 people found the following review helpful. Not a reprint By Tony Horsington All text and content is made up from photo's of original Stanley publications. My copy proved difficult to read due to a reduction in size from originals and low contrast, low resolution of the photographic copies. Not what I envisaged prior to purchase as the published title was 'Stanley Tools 1929 reprint' which technically is incorrect. Tony 0 of 0 people found the following review helpful. Stanley Tools Catalogue No. 34 is Very Helpful for Antique Tool Collectors. By Lyn Tontz Excellent reprint of Stanley Tools Catalogue. Very useful. Book arrived on time and as described by seller. Thanks.

A complete reproduction of the Stanley Tools 1929 Catalog Reprint with a new introduction by Ross Bolton. This 1929 catalog is special in many ways. There are several new items that came out in this period, like screwdrivers and rules. The Tool Works had just received their patent on the 100 Plus line of screwdrivers key component, the screwdriver forced into the bolster.
