I am not much of a book learner although I do read. I am more of a visual, picture kind of guy and can figure things out much more quickly. What makes this "map" so great, it has colorful diagrams that show what needs to be done, the tools needed for the job, and there is text to get a little more info. Sometimes I forget a step or what I need to do and there is no way in hades I am going to pay someone to do a simple task like this. The "map" folds out but is also coated with plastic so that it won't get dirty, greasy, or even rip. Very durable and will last forever in my toolbox or junk drawer. Handy, easy to figure out what the job needs to be done.

Similar in format to those handy laminated city maps, this map on stopping drips and replacing faucets offers unrivaled convenience to the home handyperson. It's filled with illustrations, tips from the experts, and step-by-step directions you can really understand.
