**Graham Clarke : Success with Acid-Loving Plants (Success with Gardening)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Success with Acid-Loving Plants (Success with Gardening):

New from the popular Success With series, this illustrated field guide is geared to gardeners struggling to make plants thrive in highly acidic soil. Written to help even novice gardeners achieve outstanding results, it offers proven strategies for working within the soils limitations. There are dozens of tips on everything from adjusting pH levels with organic supplementation to planting strategies that maximize success to designing complete acid-friendly gardens. An A-Z plant directory lists flowering plants, fruits, and vegetables; shrubs, climbers, and trees that thrive in

acidic soils. There's even a section on easy-to-grow acid-tolerant houseplants. To help keep those plants healthy and strong, the guide also provides a comprehensive review of annual maintenance.

**About the Author** Graham Clarke trained in horticulture at the Royal Horticultural Society Garden and spent time working in the gardens at Buckingham Palace. He has been a gardening writer for 25 years and is the author of a number of GMC books. He is also well-known for his contributions to magazines such as *Organic Life* and he lives in Bournemouth.
