Graham Clarke : Success with Sun-Loving Plants (Success with Gardening) before purchasing it in order to gage whether or not it would be worth my time, and all praised Success with Sun-Loving Plants (Success with Gardening):

1 of 1 people found the following review helpful. sun loving plantsBy Shirley Jean SchrockThe book hekped a lot, living in Florida, it is soooo hot in the summer now I feel more informed as to where to plant what, great book !

As gardeners become increasingly concerned with both drought and water conservation, plants that love the sun are an attractive option. From white flowering hawthorns to richly scented wisteria, they come in all shapes, colors, and sizes, with endless potential for producing stunning planting schemes. Youll find success with this vividly illustrated volume, which shows how to select the best sun-friendly varieties and plant them with confidencewhatever your experience. After explaining exactly how sunlight affects plants, it discusses creating the small amount of necessary shade; choosing and buying trees, shrubs, and flowers; preparing the soil; maintaining the plants, and solving common

problems. A huge and beautiful A-Z directory covers annuals, biennials, and bedding plants; bulbous plants; perennials, climbers, conifers, and more.

About the AuthorGraham Clark trained in horticulture at the Royal Horticultural Society Garden, Wisely, and subsequently spent a year working in the gardens at Buckingham Palace. He has been a gardening writer for 25 years, is well-known for his contributions to magazines such as Horticulture Week, Organic Life, Gardens Monthly and The Garden (RHS). He is the author of a number of books and lives in Bournemouth.
