Mr. Ray Arjom : Survival of the Smartest before purchasing it in order to gage whether or not it would be worth my time, and all praised Survival of the Smartest:

Survival Of The Smartest, a science fiction horror book of prophecy, tells of the planet Huw, on which super intelligent, ant-like Huwites have raised (from a single stolen human DNA) billions of humans in automated meat

factories for their delicious brains. Humans live a hellish life on Huw as food commodities and slaves. The Master Huwites are in complete control. As they say on Huw, 'There is no match for having more brain!' Or are they? For one thing, the Master Huwites cannot control the terrorists that are struggling against the cruelty and injustices that are central to the Huwite society. Survival Of The Smartest offers a twisted story from local heroes to cosmic struggles of good against evil. Each chapter leaves the reader in suspense and ready for the next.
