**Susan M. Winchip : Sustainable Design for Interior Environments Second Edition** before purchasing it in order to gage whether or not it would be worth my time, and all praised Sustainable Design for Interior Environments Second Edition:

0 of 0 people found the following review helpful. reasonable price and great customer service By Shirley I purchased this book for college . It's not one of the most interesting books I have seen , but I will need it for the semester. Thanks to TEXTBOOK NOOK for the fast delivery, reasonable price and great customer service. I really appreciate it . I will definitely purchase more books from u again... 0 of 0 people found the following review helpful. Five Stars By Sylvia J Strother Thanks 2 of 2 people found the following review helpful. Ridiculous gouging the students of America for trying to better their lives By Ryan Boyer Why the hell are text books SOOOOOO expensive. Ridiculous gouging the students of America for trying to better their lives.

Sustainable Design for Interior Environments, 2nd Edition, builds on the first edition's premise that the interior design profession has a social and moral responsibility to protect the health, safety, and welfare of people and the environment. The text equips professors, students, and practitioners to design sustainable interiors by addressing LEED certification, environmental concerns, ecosystems, ethics, values, worldviews, and the ways in which science and technology can be used to address environmental challenges. Through content, organization, and pedagogical features, the book integrates complex sustainability topics directly into the design process, thereby enabling readers to apply the concepts of sustainability with the same ease as they do the elements and principles of design.

About the Author Susan M. Winchip, LEED AP, is a Professor Emeritus of Interior and Environmental Design in the Department of Family and Consumer Sciences at Illinois State University. She has over 20 years of experience designing residential, corporate, and institutional interiors with specialties in lighting and sustainability.
