Margaret Fisher : Take Our Advice: A Handbook for Gardening in Northern Virginia before purchasing it in order to gauge whether or not it would be worth my time, and all praised Take Our Advice: A Handbook for Gardening in Northern Virginia:

2 of 2 people found the following review helpful. Wonderful Book! By Sharon McDonald This book is a great help and if like me, you live in Northern Virginia and care about wildlife and native plants, buy this book. Margaret Fisher does a wonderful job of pulling together an abundance of helpful information for gardeners of Native plants and wildlife

lovers.0 of 0 people found the following review helpful. Northern VA, DC or MD - This book is for youBy DogpondIf you live in what is often referred to as the DMV, then this book will be useful. Clear and useful advice written by someone who actually gardens here. I like it enough that I recommended our local garden produce store think about carrying it in their store. I might go back and buy them one so they see how useful it would be for local customers.0 of 0 people found the following review helpful. Five StarsBy Tantha F.very detailed and nice for a beginner

What's different about Northern Virginia? What are your neighbors' secrets to a flourishing garden? In this second edition, over 90 gardeners and naturalists teach us how to create an aesthetic habitat that works for wildlife as well as for ourselves. Topics include: Basic gardening topics -favorite tools, mistakes to avoid, water features, saving money, gardening with children, dealing with deer and other critters, container gardening, growing from seeds, life in the soil, mulch, woodland walks, ferns, trees, groundcovers, ornamental grass, houseplants, bonsai, reliable plants, and more. Edible gardening - fruits and vegetables, tomatoes, blueberries, strawberries, beekeeping. Fitting into our ecosystem - native plants, removing invasive aliens, organic gardening, rain gardens. Information about local resources - garden centers, public gardens, volunteer opportunities, plant sales and shows, garden clubs and societies. A very extensive index will tell you at a glance whether a plant is native, invasive, or deer-resistant.
