Nan Sinton, David C. Michener : Taylor's Guide to Ground Covers: More than 400 Flowering and Foliage Ground Covers for Every Garden Situation - Flexible Binding (Taylor's Gardening Guides)

before purchasing it in order to gauge whether or not it would be worth my time, and all praised Taylor's Guide to Ground Covers: More than 400 Flowering and Foliage Ground Covers for Every Garden Situation - Flexible Binding (Taylor's Gardening Guides):

0 of 0 people found the following review helpful. Quit being frustrated by your shady areas!By CustomerAmazingly complete, used this in combination with McKenzie's Perennial Ground Covers. No more trying to grow grass under trees where no grass will ever grow. Go with the flow, plant something else. It can be perennial and drought-resistant and native if you just read a little! Quit being frustrated by your shady areas!0 of 0 people found the following review helpful. Five StarsBy psialadyTaylor books are the best for gardening reference0 of 0 people found the following review helpful. Five StarsBy PuggyPattyItem nicely written. Thanks!

No category of plants works harder than ground covers to help a gardener create a beautiful yet low-maintenance landscape. In this book readers will discover the best plants to stabilize banks and control erosion to substitute for turf where grass won't grow or is hard to mow to line curbs and driveways, where salt will damage ordinary plants to enhance a landscape with broad, dramatic sweeps.

About the AuthorNan Sinton is the director of programs at Horticulture magazine. She resides in Marion, Massachusetts. David Michener is assistant curator of the University of Michigan Botanical Garden. He resides in Ann Arbor, Michigan.
