Interesting and knowledgeable reading if you're into gardening or farming or both.

How to Drop the Crime, Crowding, and High Cost of Living - and Make a Real Living
Thought about living a peaceful, quiet, and safe life? Do you think a healthy farming lifestyle has to be done on a huge scale? Think again. "Too many in these several classes think they know enough. They measure a man's knowledge by the number of his acres. Hence, in their eyes the owner of a plot so humble as mine must know so little as to be unable to teach them any thing new." Happily, it is not for these that I write, and hence it would be unreasonable to expect them to become readers. I write more particularly for those who have not been brought up as farmers for that numerous body of patient toilers in city, town, and village, who, like myself, have struggled on from year to year, anxious to break away from the bondage of the desk, the counter, or the workshop, to realize in the country even a moderate income, so that it be a sure one. "Many such are constantly looking round in this direction for something which, with less mental toil and anxiety, will provide a maintenance for a growing family, and afford a refuge for advancing agesome safe and quiet harbor, sheltered from the constantly recurring monetary and political convulsions which in this country so suddenly reduce men to poverty." But these inquirers find no experienced pioneers to lead the way, and they turn back upon themselves, too fearful to go forward alone. Books of personal experience like this are rare. This is written for the information of the class referred to, for men not only willing, but anxious to learn. "Once in the same predicament myself, I know their longings, their deficiencies, and the steps they ought to take. Hence, in seeking to make myself fully understood, some may think that I have been unnecessarily minute. But in setting forth my own crudities, I do but save others from repeating them."
