Jan I. Yeager, Lura K. Teter-Justice : Textiles for Residential Commercial Interiors before purchasing it in order to gage whether or not it would be worth my time, and all praised Textiles for Residential Commercial Interiors:

0 of 0 people found the following review helpful. School BookBy NikkiI needed this book for my interior class. I bought it used and is in good shape. There is a lot of information in it. I do wish though there were colorful pictures.2 of 2 people found the following review helpful. Great book for Interior DesignersBy L. SimmonsOf all the textile books, this is the best one for INTERIOR DESIGNERS (or decorators that want to learn more about fabric and codes). It does have black and white photos and it can be a bit hard to read at times, but overall it is very informative and a great reference book to have. The layout and organization is actually better than most textile books. Furthermore, if you are a student and have a good professor, you don't need color photos to comprehend this book.6 of 7 people found

the following review helpful. This book needs help!By Ms. Tara L. HapgoodThere is oodles of info in it, however, it is the absolute driest book I've ever had to read. I actually love the majority of my textbooks. As a design student, I expect a book to have nice color photos, beautiful layout and an organization that is more appealing. This book needs help! How about a graphic design professional to work the layout and photos, maybe pay a little extra for some color pages (it looks like it was printed on a copy machine as is) and maybe someone to edit the copy so it is more palatable and less tiring. When I know I need to catch some zzzzz's, I just open this book and try to read a few paragraphs.

This revision is devoted entirely to textiles for interiors and provides a comprehensive and complete coverage of essential topics. Beginning with a primer on textile fibers, the content ranges from basic textiles to end-products used in residential and commercial interiors, including textile and non-textile upholstery fabrics, window coverings, drapery linings, textile wall coverings, soft floor coverings and cushions, and household and institutional textiles. Numerous photographs and illustrations bring these concepts to life. This text includes pedagogy such as case studies, key terms, review questions, and an extended glossary.

About the AuthorJan I. Yeager is Associate Professor at West Virginia University and has served as director of the Division of Family and Consumer Sciences at the university since November 1997. She is also a fellow of the International Textile and Apparel Association and is a member of the Gamma Sigma Delta and Phi Upsilon Omicron honorary societies. Lura Teter-Justice was Assistant Professor at Eastern Kentucky University and was a showroom consultant for Ferguson Enterprises, Inc.
