**Marc E Paulsen : The Amazing Story Of The Fabulous Medjool Date** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Amazing Story Of The Fabulous Medjool Date:

1 of 1 people found the following review helpful. If You Love Dates, This is a Must Read!By C. WongIt is difficult to tell you anything about The Fabulous Medjool Date by Marc C. Paulsen without telling you everything! The author has extravagant praise for a particular variety of date but I know that he is right. I ate this date on long trips to Indio, California and bought them in a grocery store in Loma Linda, California. It is large, plump and bursting with flavor. If

you haven't eaten a Medjool date you won't know what I am talking about. It spoiled me for all other varieties. When I saw that a whole book had been written about this date, I had to read it. Mr. Paulsen loads this book with history of the Medjool. Did you know that dates have been cultivated by man for 6,000 years? But the Medjool was facing extinction because of nasty disease, Baioudh. There is a fascinating tale of Morocco contacting the United States Department of Agriculture for help. It is very tempting to tell you much more of the story but I am going to restrain myself! Besides the history, details of the labor intensive cultivation of this date are covered. Richly illustrated this book also answers these questions: 1. Where do the baby date trees spring from? 2. What protective armor does the date tree have? 3. What rodent can do tremendous damage to date trees? 4. What is the best way to store dates? In addition to all this information, there are 100 recipes for dates in the back of the book. I really enjoyed learning about this variety of date. Thank you, Mr. Paulsen for writing this book. I highly recommend this book to anyone who loves dates and loves learning. I received this ARC of *The Fabulous Medjool Date* from FirstReads but that in no way influenced my thoughts or feelings in my review.

Learn the story of the investment of human effort, natural resources, and perseverance and dedication required to propagate a Medjool palm grove and produce a successful crop of this gourmet delicacy. Plus: 100 Medjool date recipes!

About the Author Marc Paulsen's background began with building construction and expanded to include fine art dealing, interior design, airplane sales and real estate development. Mr. Paulsen has served on management assignments ranging from trade show exhibitions of national scope and museum consultant to project manager for high-rise office construction and large sawmill machinery installations. He has traveled numerous countries and, while serving with the U.S. Armed Forces in Germany, wrote many articles on tourism. Marc's interest in the famed Medjool date came about as a fluke. While enjoying desert sunshine in southern Arizona, he stopped to take photos of men working high in date palm treetops. A palm grove worker invited him to come into the grove to film the palms close-up. This book is the result of that simple original effort to take an unusual and interesting photograph.
