Gennaro Postiglione : The Architect's Home before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Architect's Home:

0 of 0 people found the following review helpful. Home Architecture that Educates and Inspires. By Jacob Mason I haven't even gotten halfway through this book yet, and I'm already feeling inspired by the classic and far too often forgotten styles and unique approaches to home architecture that wasn't even remotely aware of the residential brick and mortar confines that dominate much of today's landscape. Pay no attention to the criticism being directed at this book for lacking color photo spreads. To expect 50MP CMYK color quality from what little photo documentation they had back in the late 1800's and early 1900's is purely silliness. Given that they even documented much of these now demolished and/or off limits works of art is what stands to be appreciated. 0 of 0 people found the following review

helpful. One of Taschen's better releasesBy The BoyersOne of Taschen's better releases. Typical entries include a brief summary, a detailed essay, floor plans of varying scale (but most big enough to be useful), and a mix of period and recent photographs, if extant. Many of the architects will not be familiar, but it's good to see a book that goes beyond the usual short list of the most famous practitioners. And given its size, it's a real bargain.0 of 0 people found the following review helpful. ... book in a shop in Paris and fell in love, and ordered it as soon as I was ...By David MillsteinI saw this book in a shop in Paris and fell in love, and ordered it as soon as I was home. A gorgeous collection of photographs that will have you salivating at the possibilities of living in such spaces.

Autobiographical homes: The houses architects design for themselves

About the AuthorGennaro Postiglione studied architecture and completed post-doctoral studies in industrial design in Naples. He has been a visiting lecturer and professor in other countries and since 1998 has been teaching design in the department of Interior Design at Milan Politecnico. His research work focuses on interior design and on the relationship between architecture, culture and current events. Gennaro Postiglione is editor of Area magazine.
