**Jean-Claude Roussel, Paule Roussel : The Art of Furniture Decoration (Ulisseditions)** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Art of Furniture Decoration (Ulisseditions):

For centuries artists and craftsmen throughout Europe dedicated themselves to the decoration of furniture, curios and a host of different items made of wood. The techniques described by the authors ally the traditional and the modern, in a way that leads to the development of a personal touch.

From Library Journal In this well-illustrated book, the authors, both professional decorative painters, adequately describe the preparation of and paint techniques used to decorate furniture. How to paint decorations such as flowers, fruit, and the like is shown in sequence. But measurements are given in metrics, and the chemical products pictured are French. More detailed directions for this type of freehand painting can be found in Jackie Shaw's *Big Book of Decorative Painting* (Watson-Guptill, 1994). Copyright 1996 Reed Business Information, Inc.
