THE CABIN IN THE CLEARING covers the story of the relatively short peril in American history when these small structures were our first primitive homes. Jim Baker's drawings and text show how they were built and furnished, and what it was like to live in them. As he says,"They were tiny and crude; their furnishings sparse... but even in its most rudimentary state the log cabin was a very efficient shelter admirably suited to the needs of the first wave of settlers who crossed the Alleghenies and flowed into the vast American midwest. It deserves to be remembered."
