He is the real thing: a renaissance man who is well educated, widely experienced, and innately handy. When it comes to log home building Mac "has been there and done that." I don't understand the one and two star critics. I suggest disregarding their criticism. Buy the book(s). Better yet, meet the man and take one of his tutorials on blacksmithing, stone working, or log home construction. 0 of 0 people found the following review helpful. Must read. By Douglas Lyle Graham A must read if you are going to build a log cabin or restore one. 1 of 1 people found the following review helpful. Fantastic book By William Germany This is an amazing collection of tips, tricks, and instructions for a log

builder. The only disappointment in the entire book was the section on hewing. There weren't many pictures and I can see where new log builders would have trouble catching on. Then again, I'm a hewing addict who loves learning every nuance and variation on basic methods, so perhaps the problem is with me expecting too much. At any rate, every hewn-log builder should buy this book. Mr. McRaven is one of the foremost log buildings in North America, and the chapter on chinking alone is worth the cover price.

A classic of early American architecture, the hewn-log house has a unique rustic charm and character. In this engaging and informative guide, Charles McRaven provides illustrated step-by-step instructions that cover every aspect of building your own log house, from selecting the site and hewing the first log to laying the final chimney stone. Whether you're building a new house or restoring an old one, McRaven offers proven techniques and time-tested advice that will help you successfully create a warm and inviting hewn-log home.

this book is the perfect companion for an architect, historian or novice. At Home Arkansas a comprehensive look at the process of building and restoring with this staple of early American architecture Kitchen Bath Design News
