Larry E. Keesen : The Complete Irrigation Workbook: Design, Installation, Maintenance and Water Management before purchasing it in order to gage whether or not it would be worth my time, and all praised The Complete Irrigation Workbook: Design, Installation, Maintenance and Water Management:

1 of 1 people found the following review helpful. Three StarsBy FogoIt a very detailed book and a little more technical than I would prefer but I am keeping it.22 of 23 people found the following review helpful. Great resource to understanding irrigation when installing your own system.By CustomerThis is a helpful resource when planning and constructing your irrigation projects ranging from drip, microsprayers, to impulse sprinkler use. Handy formulas help determine watering needs, especially for those who have been so blessed to have water meters. I am fortunate to still have use of a well so I do not face metering cost issues, only electricity usage. Great reference for the do-it-yourself

individuals and those who are hiring contractors and want to know what they are trying to tell you before the job begins. Better to have a little knowledge than none at all when dealing with contractors or vendors who will sell you anything, if you are not well-informed. Have fun and enjoy your ornamental and edible landscapes! 8 of 8 people found the following review helpful. It is more suited to professionals than personal weekend property care. By J. Miller. It is a technical publication that covered everything from planning to installing a home sprinkler system. I was looking for a manual to help me do some of the repair work on my sprinkler system.

This book covers everything related to landscape irrigation systems with emphasis on water conservation. Keesen has extensive field experience in every area of the landscape irrigation business including design, installation, maintenance, inspection, evaluation, problem solving and irrigation scheduling.

About the Author Larry Keesen started worrying about water at an early age. He was 13 when he began hand watering lawns in the Denver Country Club. It's been uphill ever since. Keesen has been involved in every area of the irrigation business including contracting, design, installation, maintenance and water management. He was one of the founding members of Xeriscape and served for many years on the Irrigation Association's Certification Board of Governors. He has been a consistent force in Denver's green industry through participation in the Associated Landscape Contractors of Colorado. He is also a recipient of the prestigious Bob Cannon Award for outstanding service to the industry. Keesen Water Management, Larry's design and consulting firm, is proud of its irrigation design and evaluation work including: West Point Military Academy, Colorado's State Capitol grounds, The Tennessee Valley Authority, Kaiser Permanente and Elitch Gardens, a local amusement park. In addition to running his business, Keesen enjoys traveling and presenting irrigation seminars throughout the country as well as writing a wide range of articles for industry publications.
