The most beautiful homes from amazing lifestylesBy Doug McCartneyAdler's homes are inspirational because they're traditionally designed and include an elegant spirit that just makes you feel like saying, "that's a beautiful home." There are interior photos that are of the most beautiful rooms I've ever seen. The book has photographs and text about each of the homes presented. The photographs are high-quality so you can study them for details. I encountered Adler in other Architectural Design books and I'm very glad to have discovered him. This is a wonderfully presented set of photographs and stories of the development of classical homes

from the age of grand houses by one of the last Architects that specialized in them.1 of 1 people found the following review helpful. The first comprehensive study of one of America's great house architects.The Country Houses of David Adler (1882-1949) discusses in depth fifteen representative houses (many with interiors by Adler's sister, the noted interior designer Frances Elkins), illustrated with fine archival photographs and newly drawn plans. In addition, the full scope of Adler's work is documented in an illustrated catalogue raisonné. Photographs and plans
