Peter Tregenza, David Loe : The Design of Lighting before purchasing it in order to gage whether or not it would be worth my time, and all praised The Design of Lighting:

0 of 0 people found the following review helpful. ... a lot of damage and was describe with very good state. There is an tag from University's library ...By CustomerThe book has a lot of damage and was describe with very good state. There is an tag from University's library on it.

Written primarily for the practising designer, The Design of Lighting brings together in one volume all that the practitioner is likely to need. The authors combine a technical introduction to lighting and colour theory with a guide to design concepts and criteria, to create a comprehensive source book for architects and designers on interior lighting design.

'The technical level is fairly high, but not off putting - and the graphics are clear and clean. A difficult job well done'. - The Lighting Journal
'A new architect-friendly text looking at the whole subject of lighting design.' - The Architects Journal
'Covers a subject central to architecture and, like it or not, it must be studied.' - Building
'It is well written and clearly laid out. All in all, this book is an enjoyable way of learning about lighting.' Ergonomics Abstracts, 2001, Vol. 33, no. 2
