Claude Monet (1840-1926) was the famous French painter who created a grand and beautiful garden in Giverny, France, filling it with irises, poppies, roses, and, of course, water lilies, which he celebrated in his vast and glorious paintings. This new view of Monet and his garden will delight children and gently teach them about his art. The book

tells how the Impressionist artist arrived at his garden; about the bright Japanese prints he collected that inspired him; about his famous visitors; how he painted outdoors in all weathers; and about his gardeners, who had to leave Giverny to go to war. Spread by spread, the garden is explained and built up in Ascaris and Valentinis original illustrations that take Monets work as their starting point and reimagine it in stunning and unusual ways.

"This import is a refreshing graphic-novel-inflected collaboration by two living artists about a third... The spare text is well-paced with carefully selected details. Illustrations feature strong, black graphic lines and wonderful flat expanses of color that echo the Japanese prints that inspired the impressionists. The real star here is the garden. Ascari and Valentinis help readers see Monet's vision and watch the garden develop and grow... A handsome, appealing, informative look at an artist who continues to fascinate."
