1 of 1 people found the following review helpful. Nothing special in my opinion.By DONI am somewhat disappointed in this book. It is more geared towards Britain and Europe more so than the USA and really is nothing special. Not a bad book, just so-so. It has its moments where the information is quite informative and valuable but for the most part I

say "Ho-Hum." I am an avid gardener and really did not get all that much out of this book. Perhaps my expectations were too high. I would not buy it again if given the chance to do so. 0 of 0 people found the following review helpful. Four Stars
