Jon Broome : The Green Self-Build Book: How to Design and Build Your Own Eco-Home (Sustainable Building) before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Green Self-Build Book: How to Design and Build Your Own Eco-Home (Sustainable Building):

0 of 5 people found the following review helpful. Five Stars By denise dansongreat

Whether you want a turf roof, solar-powered hot water, or a superinsulated (and cost-efficient) house, you need to know the essential elements of the self-build process, and in The Green Self-Build Book, Jon Broome gives an overview of the different methods of sustainable and eco-friendly construction techniques. The book includes case studies of green building techniques such as earth and straw bale buildings and is intended for anyone who is planning a self-build project, housing professionals, students, and teachers. The Green Self-Build Book gives inspiration and

information to guide you through the green self-build process.

About the AuthorJon Broome is an architect who has self-built two houses. He is a former director of Architype, a London-based architectural practice working on housing, education, health, and community buildings with specialist expertise in low-energy design, timber-frame construction, and sustainable building. He is a coauthor of *The Self-Build Book* and contributor to *Housing the Environment*. He runs his own consultancy specializing in sustainable construction in London.
